Summary

Computer Science Engineering graduate with hands-on experience in Java Full Stack Development, SQL, JDBC, Servlets, REST APIs, and web technologies. Strong foundation in Object-Oriented Programming, Data Structures, database management, and problem-solving, with experience developing Java-based web applications.

Skills

Programming Languages: Java, SQL

Backend & Data Access: JDBC, Servlets, JSP, Hibernate, REST APIs

Frontend: HTML, CSS, JavaScript

Databases: MySQL, DDL, DML, Joins, Aggregate Functions, Subqueries, Views, Indexes

Software Engineering Practices: Object-Oriented Programming (OOP), Data Structures

Tools & Platforms: Git, GitHub

Experience

Java Full Stack Web Development Intern Jan 2026 – July 2026 *Tap Academy, Bengaluru*

- Developing and enhancing custom full-stack software components using Java, HTML, CSS, and SQL, applying Agile development practices to deliver scalable, business-ready solutions.
- Implementing backend functionality with JDBC, including RESTful data access and API-driven database operations, to improve system performance.
- Building and managing reusable API endpoints to support seamless integration between frontend interfaces and server-side logic.
- Designing responsive, user-focused interfaces and integrating them with server-side APIs to enhance application usability.
- Applying Object-Oriented Programming principles and modern frameworks to build maintainable, high-performing, scalable applications, using Git for version control and team collaboration.

Projects

Tapy Foods – Food Ordering Web Application

- Designed a Java Servlets, JSP, and MySQL web application applying API-driven architecture to power live menu filtering, real-time quantity selectors, and shopping cart functionality.
- Implemented secure user authentication and API-based order management, including individualized order history tracking and a live order tracker timeline, translating backend logic into actionable customer-facing features.
- Delivered a responsive, high-performing user interface using vanilla CSS and JavaScript to improve overall user experience.

Offline-First Emergency Communication System

- Built a full-stack emergency communication and monitoring system with real-time alert handling and API-integrated live GPS location tracking.
- Designed offline-first functionality using localStorage with automatic data synchronization via API calls once connectivity is restored, ensuring high system reliability.
- Developed core features including emergency image upload, interactive Leaflet map integration, an analytics dashboard, fullscreen map view, dark mode UI, and emergency status management components.

Education

Shree Devi Institute of Technology, Mangalore 2022 – 2026
Bachelor of Engineering – Computer Science and Engineering CGPA: 8.36

Certifications

- Google AI Essentials – Coursera
- SQL Certification – Simplilearn

Achievements

- Awarded Rajyapuraskara (State Award), Bharat Scouts and Guides, for leadership, discipline, and social service.
- Secured 2nd place in an inter-college technical event; organized a college-level technical event.
